Pricing Segmentation

Tier	Typical platforms	Ghostrader implication
Free / freemium	TradingView, Finviz, Webull, Yahoo/Investing, Simply Wall St, Magnifi	Ghostrader needs a useful free or low-risk entry path for trust building.
Low to mid subscription	Finviz Elite, Seeking Alpha Premium, Stock Rover, Koyfin Plus, Magnifi	This is the likely early Ghostrader target range for beginner/prosumer investors.
High active trader subscription	Benzinga Pro, TrendSpider, Trade Ideas, MarketSurge	Ghostrader should not copy their complexity; compete with simpler intelligence and lower cognitive load.
Enterprise	AlphaSense, Bloomberg-like research workflows	Aspirational: bring selective enterprise research patterns to retail users without enterprise pricing.

Design conclusion: Ghostrader should initially avoid premium terminal pricing. The best first commercial target is a subscription that feels less expensive than combining TradingView + Seeking Alpha + Finviz + news tools.

References and Source Notes

Pricing and product information should be re-verified before investor or public use. Vendor pricing changes frequently, and some platforms use promotional, annual, regional, or quote-only pricing.
