Prioritized Ghostrader Opportunity List

The following opportunities are ranked by commercial relevance, user pain intensity, differentiation, and near-term buildability.

Rank	Opportunity	Why it matters	Impact	Effort	Differentiation
1	Unified AI market briefing	Users hate tool-switching and subscription stacking. Build one daily briefing: what moved, why, risk, and what to watch.	High	Medium	Very High
2	Explainable Ghost Score	A single score is useful only if users trust it. Show technical, fundamental, news, risk, and confidence contributions.	High	Medium	Very High
3	Beginner mode	Many platforms overwhelm new investors. Provide plain-English explanations, risk warnings, and a guided workflow.	High	Low-Med	High
4	Research workflow consolidation	Combine screener, watchlist, analysis, summary, news, and report export in one application.	High	High	High
5	AI chat over market data	Let the user ask why a stock moved, what changed, and what risks matter without searching multiple sites.	High	High	Very High
6	No-noise dashboard	Keep the first screen limited to opportunities, alerts, market mood, and user watchlist changes.	Medium	Low	High
7	Evidence register per signal	Attach sources, indicators, news items, and calculation rationale to each recommendation.	Medium	Medium	High
8	Report builder	Generate PDF intelligence reports for a symbol, watchlist, or sector.	Medium	Medium	Medium-High
9	Mobile companion later	After desktop value is proven, build mobile alerts and summaries rather than full charting.	Medium	High	Medium
10	Education layer	Explain terms and rationale in context, reducing beginner churn.	Medium	Low-Med	Medium-High
